

Cancer Research UK's IS Department trials new shared desk scheme

-Charity using Condeco's desk booking software to enable flexi-working-

The UK's leading charity is piloting a new flexi-working scheme within the IS Department at its head offices in central London.

Cancer Research UK has joined forces with RNM Systems to implement the desk booking module of its Condeco software suite, which is enabling the IS department to manage its office space more efficiently.

Staff numbers within the department were, at times, flexing up to 200 to cope with large projects. There were 140 desks available and allocated to staff but as a good percentage of these staff were regularly working off-site, the IS Department was finding that its office space was vastly under-utilised. With no more space available the department needed to expand its workforce without expanding its estate.

Condeco's user-friendly desk booking software will ensure that the desks within Cancer Research UK's IS Department space are fully utilised, eliminating the unnecessary wastage associated with empty desks.

Jane Swindle, IS Business Change Manager at Cancer Research UK, said: "We're delighted to be working alongside RNM Systems on this new project. Condeco has the potential to allow us to raise office utilisation, reduce our energy bill, reduce our carbon footprint and, in the process, make real estate savings."

Paul Statham, managing director at RNM Systems, said: "Cancer Research UK is the largest and one of most well-known charities in the country. It is an organisation that is constantly seeking to reduce costs and, as a result, needs to ensure it is making full use of the office space it has available."

He continued: "We are convinced that Condeco will now play a major role in helping them reach this goal and we look forward to working together to help the charity make efficiency and cost savings wherever possible."

-ends-

Notes to editors:

RNM Systems is a specialist in workspace management and booking solutions. Its award-winning Condeco software suite provides large enterprises and SMEs with the ability to manage the day-to-day aspects of office life with ease and fluidity.

Condeco scalable workspace management software provides *Meeting Room Booking, Desk Booking, Car Parking* and *Visitor Management*, through one centralised web based application.
