

### **Condeco scoops another major FM award**

*-Best Product Innovation at the Working Buildings Innovation Awards 2009-*

RNM Systems/Condeco, a specialist in workplace management, has won the prestigious *Best Product Innovation* accolade for its new Desk and Room Screen at this year's Working Buildings Innovation Awards 2009.

Condeco Desk Screen and Room Screen were selected from a cluster of cutting edge workplace management products at this year's award ceremony, which took place at the Working Buildings 09 show in Kensington Olympia, London.

The two new touch-screen enabled products allow office workers to book and check-in to shared desks and meeting rooms at the office in real-time, providing them with improved access to office facilities and a more efficient way of working. The screens offer fresh and pioneering ways to maximise office utilisation, improve management of office space and facilitate flexible working.

"There is tremendous demand in the office market for cutting edge workplace management tools that help to make working life easier, especially when it comes to booking desks and meeting rooms," said Paul Statham, managing director of RNM Systems.

He continued: "We are delighted that our products are receiving the industry recognition that they deserve as we continue our drive to help companies and public sector organisations manage their workspaces more effectively."
