

Condeco

Smarter car parking: maximise space and encourage greener travel

Condeco's Car Parking module allows you to manage your car parking spaces by allocating spaces directly to staff and users or by allocating users to a range of booking schemes.

Users can book spaces through interactive floor plans or through an advanced search. This allows finding specific spaces in their scheme, or the best possible match of a number of spaces for a number of days.

You can maximise your car parking space utilisation by running a booking scheme and limit the amount of days that users can book a space. By limiting the amount of bookings that users can make in a month, you'll encourage them to release their space when they don't need it. Empty spaces can be allocated to visitors on the day via the floor plans or searching for an available space.

By implementing such schemes you can also encourage greener travel by allocating more parking spaces to users in car pool schemes. For other users you can limit the amount of days in a month that they can book a space for to encourage the use of public transport. Either way will help you to get the most out of your limited parking space and the same time reduce the carbon footprint of your business.

The parking spaces can be added through Condeco's administration section and then positioned on the floor plan through a 'drag and drop' user interface. The system enables staff who use the car park to choose to be in one of three schemes and their car park booking is governed by whichever appropriate scheme they have entered into.

SYSTEMS

A range of booking schemes for total car parking management

Car parking schemes:

The reserve scheme

Allows members of staff to reserve a free car parking space via Condeco in the reserve scheme area of the car park. People in this scheme are only allowed to book a maximum number of spaces per calendar month. Once their monthly allocation has been reached, staff in the reserve scheme will no longer be able to book a space unless they release one or more bookings for the month.

The lift share scheme

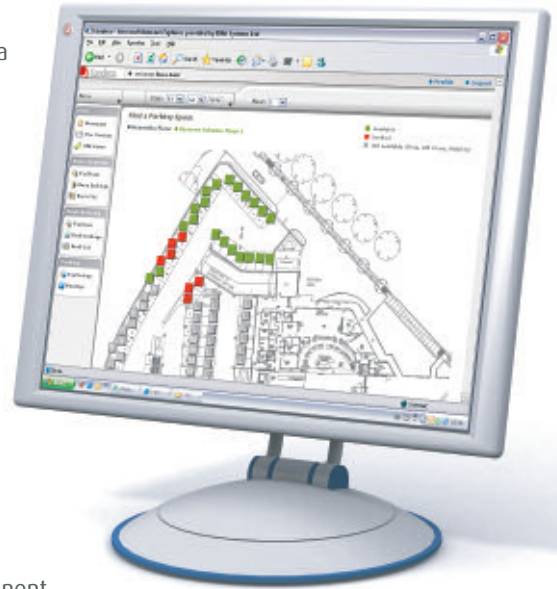

Can only be opened to members of staff who share cars. Car shares must contain at least two members of staff with no maximum number in a share (although this is limited by the number of people in a car). Members of the lift share scheme are guaranteed an allocated space every day. Each member of the lift share scheme is allowed a number of days with single car occupancy per month.

The mobility scheme

This scheme enables members of staff who have either permanent or temporarily impaired mobility to be allocated a parking space and use the space for as long as it is allocated to them.

About us

RNM Systems is a specialist in workspace management and room booking solutions. We pride ourselves on delivering dedicated solutions that maintain flexibility whilst working towards clients' specific needs. Our dedicated team have a wealth of experience in configuration, installation and training, ensuring our clients gets the best knowledge and service available in the market today.

Our clients include:

Barclays
BP
Diageo
DLA Piper
ESS Compass Group
Hiscox
McCann Erickson
Mishcon de Reya
Reuters
Smith & Williamson
Stephenson Harwood
Taylor Woodrow
